Bioenergetics
(including Reviews on Bioenergetics)
Vol. 1060, 1991

Cumulative Contents

Regular Papers

Deletion of the gene encoding the Photosystem II 33 kDa protein from *Synechocystis* sp. PCC 6803 does not inactivate water-splitting but increases vulnerability to photoinhibition
S.R. Mayes, K.M. Cook, S.J. Self, Z. Zhang and J. Barber (U.K.) 1

Ultrafast pump-probe spectroscopy of bacteriochlorophyll *c* antennae in bacteriochlorophyll *a*-containing chlorosomes from the green photosynthetic bacterium *Chloroflexus aurantiacus*
S. Lin, H. Van Amerongen and W.S. Struve (U.S.A.) 13

Direct evidence of the metal-free nature of sirohydrochlorin in desulfoviridin
K.K. Lai, I. Moura, M.Y. Liu, J. LeGall and K.T. Yue (U.S.A., Portugal) 25

Origin of the 77 K variable fluorescence at 758 nm in the cyanobacterium *Spirulina platensis*
V.V. Shubin, S.D.S. Murthy, N.V. Karapetyan and P. Mohanty (India) 28

Apparent destabilization of the S_1 state related to herbicide resistance in a cyanobacterium mutant
D. Kirilovsky, J.-M. Ducruet and A.-L. Etienne (France) 37

Heterogeneity among Photosystem I
P. Svensson, E. Andreasson and P.-Å. Albertsson (Sweden) 45

Photoactivation of the water-oxidizing complex of Photosystem II core complex depleted of functional Mn
N. Tamura, H. Kamachi, N. Hokari, H. Masumoto and H. Inoué (Japan) 51

Structure and energy transfer of the phycobilisome in a linker protein replacement mutant of cyanobacterium *Synechococcus* 7942
R.P. Bhalerao, T. Gillbro and P. Gustafsson (Sweden) 59

Light 2 directed changes in the effective absorption cross-section of Photosystem II in *Synechocystis* 27170 are related to modified action on the donor side of the reaction center
A.F. Post, M. Mimuro and Y. Fujita (The Netherlands, Japan) 67

Why is inorganic phosphate necessary for uncoupling of oxidative phosphorylation by Cd^{2+} in rat liver mitochondria?
H. Koike, Y. Shinohara and H. Terada (Japan) 75

The chloroplast β-subunit allows assembly of the *Escherichia coli* F_0 portion of the energy transducing adenosine triphosphatase
A.L. Munn, P.R. Whitfeld, W. Bottomley, G.S. Hudson, D.A. Jans, F. Gibson and G.B. Cox (Australia) 82

Preparation and characterisation of Photosystem II core particles with and without bound bicarbonate
S.J. Bowden, B.J. Hallahan, S.V. Ruffle, M.C.W. Evans and J.H.A. Nugent (U.K.) 89

Localization of polypeptides in isolated chlorosomes from green phototrophic bacteria by immuno-gold labeling electron microscopy
W. Wullink, J. Knudsen, J.M. Olson, T.E. Redlinger and E.F.J. Van Bruggen (The Netherlands, Denmark, U.S.A.) 97

β-Carotene within the isolated Photosystem II reaction centre: photooxidation and irreversible bleaching of this chromophore by oxidised P680
A. Telfer, J. De Las Rivas and J. Barber (U.K.) 106

Structure–function relationships of domains of the δ subunit in *Escherichia coli* adenosine triphosphatase
J. Mendel-Hartvig and R.A. Capaldi (U.S.A.) 115

Antenna organization of *Rhodopseudomonas acidophila*: a study of the excitation migration
G. Deinum, S.C.M. Otte, A.T. Gardiner, T.J. Aartsma, R.J. Cogdell and J. Amesz (The Netherlands, U.K.) 125

Review

Biochemical and biophysical properties of thylakoid acyl lipids
M.S. Webb and B.R. Green (Canada) 133

Regular Papers

Spectroscopic studies of the nickel-substituted *Desulfovibrio vulgaris* Hildenborough rubredoxin: implication for the nickel site in hydrogenases

I. Mus-Veteau, D. Diaz, J. Gracia-Mora, B. Guigliarelli, G. Chottard and M. Bruschi (France, Mexico) 159

Mitochondrial bioenergetics as affected by DDT
A.J.M. Moreno and V.M.C. Madeira (Portugal) 166

Improved UV-visible spectra of the S-transitions in the photosynthetic oxygen-evolving system
J. Lavergne (France) 175

Phosphorylation and dephosphorylation reactions in chromatophores of *Chromatium vinosum* and *Chromatium tepidum*
T. Nozawa, M. Ohta, M. Hatano and M.T. Madigan (Japan, U.S.A.) 189

Structural studies of cytochrome *c*-554 from *Chloroflexus aurantiacus* by resonance Raman spectroscopic techniques
G. Heibel, K. Griebenow and P. Hildebrandt (F.R.G.) 196

The rotenone-insensitive reduction of quinones and nitrocompounds by mitochondrial NADH : ubiquinone reductase
D.A. Bironaite, N.K. Čenas and J.J. Kulys (Lithuania) 203

An extended dynamic model of oxidative phosphorylation
B. Korzeniewski and W. Froncisz (Poland) 210

Total immobilization of the extrinsic 33 kDa protein in spinach Photosystem II membrane preparations. Protein stoichiometry and stabilization of oxygen evolution
I. Enami, M. Kaneko, N. Kitamura, H. Koike, K. Sonoike, Y. Inoue and S. Katoh (Japan) 224

Rapid Report

Directed mutagenesis of the gene *psaB* of Photosystem I of the cyanobacterium *Anabaena variabilis* ATCC 29413
M. Toelge, K. Ziegler, I. Maldener and W. Lockau (Germany) 233

NC-IUB: Nomenclature of electron-transfer proteins vii

Regular Papers

Picosecond fluorescence kinetics of the D_1-D_2-cyt-*b*-559 Photosystem II reaction center complex. Energy transfer and primary charge separation processes
T.A. Roelofs, M. Gilbert, V.A. Shuvalov and A.R. Holzwarth (Germany) 237

The influence of quenching by open reaction centres on the Photosystem II fluorescence emission spectrum
R.C. Jennings, G. Zucchelli and F.M. Garlaschi (Italy) 245

Synaptin/synaptophysin, p65 and SV2: their presence in adrenal chromaffin granules and sympathetic large dense core vesicles
T. Schmidle, R. Weiler, C. Desnos, D. Scherman, R. Fischer-Colbrie, E. Floor and H. Winkler (Austria, France, U.S.A.) 251

Oxidative inhibition of red blood cell ATPases by glyceraldehyde
M.L. Mira, F. Martinho, M.S. Azevedo and C.F. Manso (Portugal) 257

Modified bacterial reaction centers. 4. The borohydride treatment reinvestigated: comparison with selective exchange experiments at binding sites $B_{A,B}$ and $H_{A,B}$
A. Struck, A. Müller and H. Scheer (Germany) 262

Kinetic modelling of exciton migration in photosynthetic systems. (1) Effects of pigment heterogeneity and antenna topography on exciton kinetics and charge separation yields
M. Beauregard, I. Martin and A.R. Holzwarth (Germany) 271

Distribution of control of oxidative phosphorylation in mitochondria oxidizing NAD-linked substrates
R. Moreno-Sánchez, S. Devars, F. López-Gómez, A. Uribe and N. Corona (Mexico) 284

Respiration in non-phosphorylating yeast mitochondria. Roles of non-ohmic proton conductance and intrinsic uncoupling
R. Ouhabi, M. Rigoulet, J.-L. Lavie and B. Guérin (France) 293

Proton pumping inorganic pyrophosphatase of pea stem submitochondrial particles
A. Vianello, M. Zancani, E. Braidot, E. Petrussa and F. Macrì (Italy) 299

Kinetic relationships between structural changes in the thylakoid membranes and photosystems organization
G. Braun and S. Malkin (Israel) 303

Does the xanthophyll cycle take part in the regulation of fluidity of the thylakoid membrane?
W.I. Gruszecki and K. Strzałka (Poland) 310

Rapid Report

Photosynthetic energy storage in cyanobacterial cells adapted to light-states 1 and 2. A laser-induced optoacoustic study
C.W. Mullineaux, S. Griebenow and S.E. Braslavsky (Germany) 315

Erratum 319
